There is a rapid turnover of the several thousand producers supplying the Hood plant in Boston. Many corrections involving many additions and deletions of names are made daily with the Boston Health Department so that there is always available an official list of producers which is correct up to the minute. The magnitude of the task in keeping this list currently correct with one Health Department Office is indicated by the fact that it is a full time job for one clerk. Your cooperation in accepting this official listing of the producers in the Boston Health Department is earnestly solicited.

There is a rapid turnover of the several thousand producers supplying the Hood plant in Boston. Many corrections involving many additions and deletions of names are made daily with the Boston Health Department so that there is always available an official list of producers which is correct up to the minute. The magnitude of the task in keeping this list currently correct with one Health Department Office is indicated by the fact that it is a full time job for one clerk. Your cooperation in accepting this official listing of the producers in the Boston Health Department is earnestly solicited.
